

MARCH 2025

MONTHLY REPORT ON ANTISEMITISM

In March, there was a **decline in antisemitism levels** across the analyzed platforms, with over **7.6 million pieces of content reviewed**.

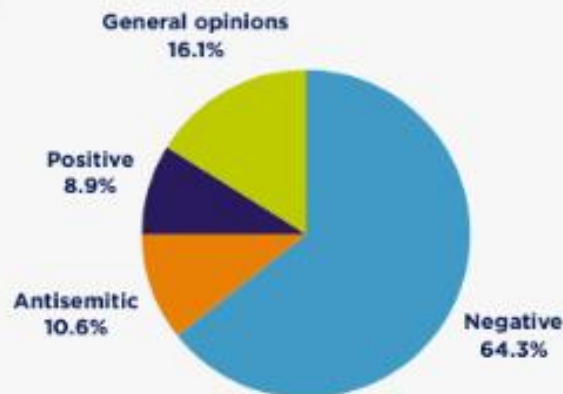

The end of **the ceasefire in the Gaza Strip** is the main event of the month. As a result, a **slight increase in antisemitism on X has been observed**. Once again, it becomes evident that there is a correlation between the level of antisemitism and wartime developments.

X (TWITTER)

On X (Twitter), **antisemitic content accounted for 15.79%**, lower than the last three months of 2024 (20.78%). The end of the ceasefire and the exchange of hostages implies a slight increase in antisemitism

FACEBOOK

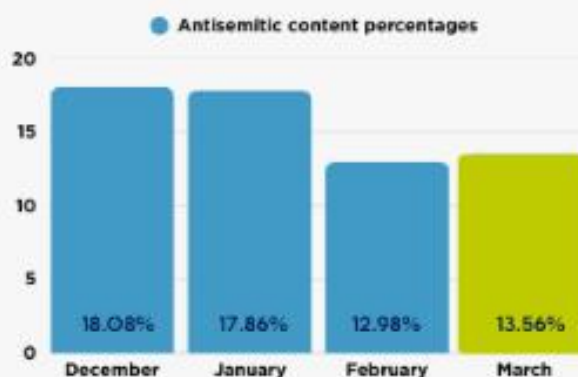

On Facebook, monthly antisemitism stood at 10.96%, below the last quarter of 2024 (11.83%).

On **YouTube**, There was no antisemitic videos recorded among the platform main results.

On **Google**, antisemitism stood at 3.33%, lower than the last three months of 2024 (4.44%).

DIGITAL MEDIA

In digital media comments, **antisemitism was recorded at 13.56%, lower than the last quarter of 2024 (20.16%).**
